Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Faxing of Responses to Office Actions

In order to reduce pendency and avoid potential delays, TC 3700 is encouraging FAXing of responses to Office Actions directly into the Group at (703)872-9306. This practice may be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into TC 3700 will be promptly forwarded to the examiner.

1. Claims 15, 18, 20, 24-26, 28, and 32-34 have been canceled.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 5-14, 17, 21, 27, 29 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Stenzel (6,318,758).

Stenzel discloses in Fig. 1 and 2, a document of value comprising a security element of a cover foil (3) of a multilayer transfer material having at least one optically variable ink material (4, as stated in Col. 3, lines 5-10); and at least one machine readable feature substance (magnetic layer 5, as stated in Col. 3, lines 40-50) that is in the form of a code; a binder (adhesive layer 12, as stated in Col 6, lines 23-38) of conductive material; wherein the security element has two liquid crystals materials with different polarizations (Col. 5, lines 25-30); wherein the optically variable material is selected from the group of pigments (Col. 5, lines 25-30); wherein the machine readable feature substance is an IR-absorbent material (Col. 3, lines 1-4).

In regards to Claim 35, the method of testing a document does not structurally limit the claim. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior art was made by a different process (see MPEP 2113). Therefore, the document of Stenzel et al can be test in any desirable method.

Art Unit:

Allowable Subject Matter

4. Claim 2-4, 16, 22, and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claim 31 is allowed.

6. The following is a statement of reasons for the indication of allowable subject matter: No prior art of record disclose plastic pellets comprising optically variable material that conveys different color effects at different viewing angles and one machine readable feature substance that does not impair a visually visible optically variable effect of the optically variable material.

Prior Art References

The prior art references listed in the attached PTO-892, but not used in a rejection of the claims, are cited for (their/its) structure. Bohm et al, Tompkin et al, Chatwin et al, Edwards, Schmitz et al, Jotcham et al, Stenzel et al, Schneider et al disclose similar security documents.
